TELLS OF BENEFITS OF FARM LOAN ACT

Frank R. Wilson Writes of Plans Included to Help Agriculturist Finance His Following.

MORTGAGES ARE RETIRED

Amortization Plan Permits Re tirement of Indebtedness Through Varied Periods.

By FRANK R. WILSON, Of the Federal Farm Loan Bureau,

One of the features of the Federal arm loan act which makes a strong appeal to farmers is that is compels them gradually to retire their indebtedness through a long or short period of years.

This process is called amortization Under it the interest and principal are paid off in equal annual or semiof the term of the mortgage the borrower is out of debt.

All loans under the farm loan act are made under the amortization or installment plan. Since the horrower begins paying off his debt the first year after he gets it, and because a long time loan is best suited to farmers, borrowers under this act are permitted to execute mortgages to run from five to forty years at their op-

Pay Any Part of Loan. Permission is given to pay all of the loan or any part of it on any interest paying date after the mortgage has run five years. Horrowers are not permitted to pay off within the first five years, because the money which they have borrowed has been procured by the bank through the sale of its bonds, and bonds cannot be sold for

To give the prospective borrower an exact idea of the size of annual pay-ments required to wipe out a mortgage in a given period, tables have been prepared. The following table shows the amount of the annual payment required to extinguish in the period indicated a \$1,000 loan bearing interest at 5,5%, and 6 per cent:

Limits to Purposes,

use of the borrowed money is limited to the following purposes; to purchase land or additional land; to chase live stock or to make any productive improvements such as clearing, fences, drainage, buildings, and machinery.

The object of amortization is to enable a farmer to turn a mortgage into an investment. When he can borrow at a less rate than it yields him he is able to pay off his indebtedness out of the profits of his investment. A long time loan enables him to use his money judiciously so that it will con-tribute to increased value of his land

Heretofore farmers have not been the borrow for long periods. This pecial meeting of the Admiral discouraged investment in live stock George Dewey Naval Camp, No. 7, and for many other purposes because Spanish War Veterans, held last night, the returns are slow. Short term loans made a speculator out of farmer,

"I have suffered for ten years with my stomach; had gastritis and catarrh; I was so nervous that I could never get a good night's sleep and would feel all done out in the morning. I had headaches, was dizzy at times, due to a deranged liver, and was badly bloated with gas which caused me constant misery. I also suffered with lumbago so badly that I could hardly move and would be laid up in bed for months at a time; I had tried many different medicines and was under treatment for the past three years, but never received any permanent relief, until I began to take your Plant Juice. I have taken two bottles and feel the best I have in years. It has made a new woman of me, in spite of the fact that I am seventy-flive years of age and had practically given up all hope. It certainly is a wonderful medicine and I am glad to give this public indorsement for it."
